

# Enamine Launches a New Chemistry Site in Germany

**Kyiv, Ukraine, May 22, 2023.** [Enamine](#), a leading provider of products and services for Drug Discovery, is proud to announce the opening of a new chemical laboratory site in central Europe. -. The new company, Enamine Germany GmbH, occupies a spacious state-of-the-art lab space in Höchst Industrial Park (Frankfurt am Main, Germany). It will provide high-quality services in the field of organic synthesis and medicinal chemistry as well as serve as an Enamine's representative in Germany.

With over 30 years of experience in the industry, Enamine has established itself as a reliable partner for drug discovery research. The new entity in Germany will expand Enamine's reach in Europe and provide local access to its efficient services. The company's expertise in organic synthesis and medicinal chemistry, with full access to unique building block collection and versatile Enamine technologies, will enable Enamine Germany to provide tailored solutions to clients around the world to accelerate their research and development programs.

**Andrey Tarnovskiy, Sales Director, Europe at Enamine:** *"During over 30 years of its history, Enamine has not only extended its unique collections of building blocks and screening compounds, but also extensively developed its services in organic synthesis and medicinal chemistry and has built numerous trusted long-term collaborations with pharma, biotech and agrochemical companies. More than half of our full-time employment (FTE) collaborations come from Europe and for us, it was a logical step to expand our presence in Europe through launching a new facility to meet the growing needs of our clients in life science industries."*

**Dr. Tim Schober, General Manager of Enamine Germany GmbH:** *"We are more than excited to launch Enamine Germany and to offer our services to clients in Germany and throughout Europe. We have a highly motivated team, which is growing with new talents and professionals. Currently, we are extensively equipping our new lab space and are looking forward to starting first synthesis projects for our customers".*
